

The DACS is the DoD Software Information Clearinghouse. The DACS serves as a gateway to software technology information by providing access to WWW resources, publishing technical reports, presenting courses, hosting seminars, publishing the *Software Tech News* newsletter, and performing special studies for patrons of the Center.

For additional information on the Intranet and Internet services available from the DoD DACS contact:

Intranets & Internet

The growth of Intranets has exploded into a global phenomenon. In the U.S. alone, recent surveys show that 96% of all large companies either have an Intranet on-line or plan to install one soon. The same is happening on every continent worldwide.

By placing web servers on corporate networks, companies are discovering that they can unlock information logjams that lower productivity. By delivering applications directly to end users through web browsers, they can bypass the costly process of procuring and delivering software to every user in the enterprise.

"Some companies installing Intranets report an astounding 1,000% return on investment in a matter of months."

Services

- ❖ Introducing Intranet and Internet Concepts
- ❖ Performing Needs Analysis and Requirements Specification
- ❖ Building the Hardware, Software, and Skills Infrastructure
- ❖ Designing WWW Intranets, and Internet Sites
- ❖ Data Warehousing, Mining, Visualization, and Knowledge Extraction from Legacy Data
- ❖ Providing Systems Administration and Support [Web Master]
- ❖ Designing and Evolving
 - Security Strategies
 - Compelling Content
 - Multi-Media Features
- ❖ Performing Intranet and Internet Auditing
- ❖ Implementing Best Practices to Maximize Enterprise Intranet and Internet Resources

DoD DACS Intranet & Internet Training Services

Like any business revolution, the Intranet requires that employees learn new ways of doing things. This in turn creates a significant new demand for training at all levels of the organization, from managers to staff members.

DACS Intranet and Internet training options include on-line, classroom, and on-site delivery.

- ❖ User Training
- ❖ Author Training
- ❖ Developer Training
- ❖ WebMaster Training
- ❖ Manager On-line Seminars
